3PL Business for Food and Restaurant Industry

We handle the delivery of chilled foods, as well as provide temporary storage, sorting, and shipping services.

With over 40 years of experience in chilled food logistics, we offer joint delivery services in the chilled food sector, where strict temperature control is required for each product. By consolidating deliveries for multiple clients, we improve truckload efficiency and enhance delivery operations. Through these approaches, we actively strive to solve major logistics issues, such as increasing logistics costs and the lack of drivers.

3PL Business for Chemical Goods

We deliver polymer-based products such as petrochemical resin materials and packaging film materials.

At Daisei Warehousing & Transport, we provide optimal logistics solutions by integrating transportation and warehousing services. Using our Just-in-Time Delivery System, which consolidates shipments from multiple clients into a single delivery, we enhance efficiency to achieve high quality and low cost for our customers.

3PL Business for Dry Freight

We deliver a wide range of products, including confectionery, apparel, and general merchandise.

Our services cover a broad spectrum—from temperature-sensitive items such as confectionery, fresh produce, and pharmaceuticals, to apparel and daily goods—allowing us to meet the diverse needs of our customers. In addition, we also operate businesses that handle the sale of used vehicles and automotive accessories.

IT Business, Service Business, and More

We operate a wide range of businesses, from tech to food and insurance.

Daisei Group is actively expanding its business beyond the logistics industry into new fields. In the area of IT, we develop proprietary systems at our overseas offices to support the Group's logistics operations. In addition, we engage in food development and sales, run restaurants, and operate hotels—diverse business ventures that contribute to the stability and long-term growth of the Group.
